YASAR REZA RAHAMAN

Senior Full Stack Developer / Consultant | React | ASP.NET Core | FastAPI | PostgreSQL

Phone: +91 7908898933 / +91 8768726481 | Email: Yasarreza456@gmail.com | LinkedIn: linkedin.com/in/yasar5 | GitHub: github.com/Yasar75

Bangalore WFO: Comfortable | Notice Period: Immediate | Current Engagement: Consultant

PROFESSIONAL SUMMARY

Software Developer with 4.5+ years of experience building enterprise web applications, React-based frontends, ASP.NET/Core and FastAPI-backed systems, REST APIs, PostgreSQL, SQL Server, Oracle SQL, debugging, troubleshooting, and unit testing. Strong track record across government platforms, internal management products, AI code-evaluation programs, dashboard/reporting workflows, and cloud-ready application delivery. Current role is a consultant engagement with immediate joining availability.

4.5+ yrs	3+ yrs	3+ yrs	Immediate
Software Development	React / Frontend	Backend / APIs	Consultant Availability

CORE SKILLS

Frontend	ReactJS, Vite, JavaScript, jQuery, HTML5, CSS3, SASS, Bootstrap 5, Axios, Recharts, responsive UI development
Backend	C#, ASP.NET Core, ASP.NET MVC, Entity Framework Core, FastAPI, Python, RESTful APIs, Swagger/OpenAPI, Web Services
Database	PostgreSQL, SQL Server, Oracle SQL, SQLAlchemy/Alembic, query writing, schema support, reporting data support
Cloud & Tools	Git/GitHub, Cloudinary setup, Vercel/Render/Choreo deployment workflows, Azure basics, Postman, API migration
Testing	NUnit, xUnit, MSTest, edge-case writing, LLM code evaluation, debugging, troubleshooting, validation logic

PROFESSIONAL EXPERIENCE

Senior Full Stack Web Developer / Consultant | GiantMind Solutions Private Limited (Turing), Chennai — *Remote | Nov 2024 - Present*

- Contributed to Google Gemini AI Code, Amazon STEM Agentic, and Nvidia Nemotron/SysBench programs through code evaluation, debugging, prompt-response analysis, and unit-test generation.
- Built and reviewed ideal code responses with edge-case-driven tests across .NET, C#, SQL, API, and frontend scenarios.
- Worked in a consultant/freelance-style engagement; available for immediate joining with no mandatory notice period.

Full Stack Web Developer | Orbitnext Tech Private Limited (Agile Labs Private Limited), Jaipur — *Onsite | Apr 2023 - Nov 2024*

- Developed enterprise-level modules across frontend, backend, API integration, database workflows, and production issue resolution.
- Implemented business logic, validations, dashboard pages, reporting flows, and API-driven interfaces for government and internal systems.
- Supported cross-functional teams with debugging, deployment readiness, database query handling, and module-level troubleshooting.

Product Developer | Bright People HR Solutions (Agile Labs Private Limited), Bangalore — *Onsite | Aug 2022 - Apr 2023*

- Built and enhanced frontend product features using ReactJS, JavaScript, jQuery, HTML, CSS, SASS, and Bootstrap.
- Resolved UI defects, improved usability, and supported product delivery through rapid debugging and stakeholder feedback cycles.

SQL Developer | Bright People HR Solutions (Agile Labs Private Limited), Bangalore *Onsite | May 2022 - Aug 2022*

- Developed and maintained Oracle SQL and PostgreSQL queries using Axpert low-code platform workflows.
- Supported database schemas, indexes, query optimization, and application data requirements.

Research Analyst | AI Workspace, Kolkata *Onsite | Jan 2020 - Jul 2020*

- Conducted technology research and contributed to application/web-design enhancement initiatives.

SELECTED PROJECTS

WMS (Welding Management System) | Frontend Developer | Reports Module & Cloudinary Support

Description: Internal welding operations platform focused on welding production workflows, welding records, inspection tracking, status monitoring, resource coordination, and reporting visibility.

Technologies: ReactJS, JavaScript, HTML5, CSS3, Bootstrap, Axios, REST APIs, Cloudinary, report/PDF workflows, Git/GitHub

- Owned frontend development for key workflow screens, report views, status displays, validations, and user-facing interaction flows.
- Supported backend work specifically for the Reports Module, including report-oriented data handling and coordination with API/report output requirements.
- Configured and supported Cloudinary setup for upload/storage needs, enabling cleaner handling of project assets and report-related files.
- Worked through feature branches, PR reviews, staging merges, UI fixes, bulk-upload/report improvements, and production-readiness updates.

One GMS | Frontend Developer | Cloudinary Integration Support

Description: Organization management web application covering authentication, role-based dashboards, employee/resource management, attendance, leave workflows, metadata services, and admin/employee modules.

Technologies: React, Vite, JavaScript, Axios, Bootstrap, React Router, FastAPI APIs, PostgreSQL, Cloudinary, environment variables, Git/GitHub

- Developed and refactored frontend modules for admin dashboard, employee dashboard, attendance, employee management, leave management, login/profile components, and metadata-driven screens.
- Integrated frontend with REST APIs using Axios, environment-based API configuration, reusable service layers, route-level views, and validation-focused UI behavior.
- Supported Cloudinary setup for both One GMS and WMS, including configuration handling and upload/storage readiness for profile/document/media workflows.
- Assisted deployment readiness by supporting environment variable setup, API gateway troubleshooting, branch workflows, build fixes, and platform-specific deployment configuration.

Google DeepMind / Google Code LLM | Senior Full Stack Developer

Description: AI code-response evaluation program focused on Gemini AI response quality, debugging, ideal-code generation, and unit-test coverage.

Technologies: ASP.NET Core MVC, C#, Entity Framework Core, PostgreSQL, SQL Server, HTML, CSS, JavaScript, jQuery, NUnit, xUnit, MSTest

- Evaluated AI-generated code against prompt requirements, corrected faulty responses, and produced stronger ideal implementations.
- Created unit tests and real-world edge cases to improve response reliability and technical correctness.

Amazon Agentic | Senior Full Stack Developer

Description: Agentic AI workflow project involving action-plan generation, semantic reasoning, ambiguity handling, and instruction-following validation.

Technologies: ASP.NET Core, C#, Entity Framework Core, SQL Server, JSON, REST APIs, NUnit, xUnit

- Designed structured outputs, validation logic, and edge-case scenarios for agent behavior and enterprise use cases.
- Improved answer reliability through reasoning checks, error handling, and compliance-focused review patterns.

Nvidia SysBench / Nemotron AI | Senior Full Stack Developer

Description: Benchmark-focused project for multi-turn instruction-following conversations, strict constraint verification, and evaluation readiness.

Technologies: Python notebooks, JSON/XML/CSV formatting, deterministic system prompts, validation checklists, Turing ChatHub workflows

- Created evaluation-grade multi-turn conversations aligned with system-prompt constraints, metadata validation, and human-audit expectations.

- Implemented quality gates using explicit algorithms, turn-level checklists, negative examples, and validator-oriented review.

Onboarding Application | Backend and Database Developer

Description: Recruitment and onboarding platform covering signup/login, CRUD operations, recruitment process management, interview scheduling, offer letters, joining letters, metadata, and role-based dashboards.
Technologies: ASP.NET Core MVC, C#, PostgreSQL, REST APIs, Swagger/OpenAPI, SMTP, ReactJS, Bootstrap, jQuery, Git

- Developed APIs for authentication, recruitment workflows, interview scheduling, offer/joining letter generation, and email communication.
- Implemented PostgreSQL-backed modules with validations, role-based access patterns, and dashboard API support.

PMS / IMMS / Government Workflow Platforms | Full Stack Developer

Description: Enterprise and government workflow systems including Project Monitoring System, Integrated Manpower Management System, DMIS, CMWMS, and Khatu Shyamji Temple modules.
Technologies: ASP.NET, C#, ReactJS, JavaScript, jQuery, Bootstrap, Oracle SQL, PostgreSQL, SQL Server, REST APIs, AJAX, JSON

- Delivered project monitoring, manpower management, vendor/resource modules, relief-bill separation workflows, dashboards, and API-integrated pages.
- Handled UI development, API integration, SQL support, issue resolution, stakeholder requirement translation, and deployment-support activities.

EDUCATION

Bachelor of Technology - Computer Science Engineering - Bengal College of Engineering and Technology, Durgapur | 2020 | DGPA: 6.95/10
Higher Secondary - Science - Burdwan C. M. S. High School, Burdwan | 2016 | 60%
Secondary - Gopalpur Sohagia High School, Rajgram | 2014 | 71.14%

COURSES AND LANGUAGES

Courses: Machine Learning - Globsyn Business School, Kolkata (2019); Core Java - JSpider, Bangalore (2021).

Languages: English, Hindi, Bengali (Native).
